[Make better investment decisions  
in your markets](#)

January 3, 2023

To whom it may concern,

Through this letter, I wish to outline Selcuk Cihan's responsibilities during his time working on Parsel.ai and certify his excellence as senior software development engineer.

I had the pleasure of working closely with Selcuk for almost 3 years, starting in January 2020, during which he has proven his capabilities in every single aspect of his role at our company.

During his time at Parsel.ai, he has worked on various mission-critical software systems, from customer-facing GraphQL APIs, to complex serverless execution orchestration on AWS, data monitoring, priority queue implementation and microservice design and implementation in general.

I've been most impressed by his exceptional ability to tackle every phase of software development with in-depth knowledge, confidence and clear communication. This starts with his incredible analytical thinking and how he structures this thought process into concrete requirements, expectations, considerations and specifications. I cannot emphasize enough how good Selcuk is at communicating in a clear and structured manner. Github issues, pull-request descriptions and code documentation were always clearly outlined, with the right level of detail to convey all critical information to his peers. He has also been pivotal in tackling new features and projects where the requirements were not yet clearly defined, to guide the team from brainstorming, to feature delivery, to maintenance and monitoring.

Beyond the requirements stage, Selcuk has shown again and again that he thrives in all areas of the software implementation phase. His coding style is stellar, his expertise in various programming languages, including Python, JavaScript and TypeScript, is extensive and his knowledge of testing is top-tier. Furthermore, the entire team relied on Selcuk's deep knowledge of AWS services, integrations and new feature releases.

I can highly recommend Selcuk for any future ventures in his field of expertise and have no doubt that he will thrive in any company and team that values building exceptional software.

Yours sincerely,

Daniel Vliegenthart  
Tech Lead at Parsel.ai  
For and on behalf of **Tellimer Technologies**
